

Figure	Table
1 Map of region	1 Listed segments
2 Surface elevation of Lake FDR	2 Mean annual discharges at selected sites
3 Surface elevation of John Day	3 Properties of the main stem hydroelectric projects
4 Surface elevation of Lower Granite	4 Temperature preferences for salmonids
5 Reverse Particle Tracking concept	5 Frequency of temperature violations
6 Predicted vs observed – Wells Dam	6 Sources of advected thermal energy
7 Predicted vs observed – Priest Rapids Dam	7 Location of tributary monitors
8 Predicted vs observed – McNary Dam	8 Geometry sources
9 Predicted vs observed – John Day Dam	9 Gagin stations
10 Predicted vs observed – Bonneville Dam	10 Samson station data
11 Predicted vs observed – Lower Granite Dam	11 LCD stations
12 Predicted vs observed – Little Goose Dam	12 AGRIMET stations
13 Predicted vs observed – Lower Monumental Dam	13 Correlation between weather stations
14 Predicted vs observed – Ice Harbor Dam	14 Mohseni parameters
15 Excursion frequency – Columbia – dams	15 Final weather station configuration
16 Excursion magnitude – Columbia – dams	16 Probabilistic parameters
17 Excursion frequency – Snake – dams	
18 Excursion magnitude – Snake – dams	
19 Excursion frequency – Columbia – no dams	
20 Excursion magnitude – Columbia – no dams	
21 Excursion frequency – Snake – no dams	
22 Excursion magnitude – Snake – no dams	
23 Excursion frequency – Columbia – tribs	
24 Excursion magnitude – Columbia – tribs	
25 Excursion frequency – Snake – tribs	
26 Excursion magnitude – Snake -tribs
